

Fitting Instructions

ALUMINIUM BOLT 333

- Designed for small interior doors, folding partitions and folding windows.
- Bolt can be used on doors as thin as 35mm (socket must be cut) when fixed semi-flush the faceplate projects 2mm.
- Care should be taken that the shoot does not foul the bottom guide.
- Fit sockets after fitting the bolts. Cut socket at along cutting line if necessary.
- For straight run doors to pass on twin tracks, the bolt must be let-in to reduce the minimum the projection of the bolt, avoiding defacing passing doors.
- Minimum door thickness shown on examples above is for cut sockets.
